

icommands in cyverse discovery environment rstudio

Run the following in the **terminal** of RStudio to get the quantigene data for analysis.

```
iinit
```

Enter the host name (DNS) of the server to connect to: **data.cyverse.org**

Enter the port number: **1247**

Enter your irods user name: **shripad**

Enter your irods zone: **iplant**

Then enter the password and load the data using:

```
iget -rPT /iplant/home/shripad/quantigene-analysis/ ./
```
